

The Rocky Mountain Association of Geologists and the **Denver Well Logging Society** are teaming up to present "**Geology and Petrophysics of Unconventional Mudrocks, 2017**", **September 27-28, 2017**. This first-time combination of the two societies will combine the two Fall Technical Symposia on the first day at the American Mountaineering Center in Golden and RMAG's 'Hot Plays' Core Workshop at the USGS in Lakewood on day 2.

The proposed technical program will be organized topically and will attempt to provide cross-disciplinary collaboration with DWLS. We welcome abstracts in the following categories:

- Unconventional mudrock plays in the Rockies
- Stratigraphic analysis of mudrock reservoirs
- Petrophysical analysis of carbonate, siliciclastic, and mixed mudrock reservoirs
- Applied reservoir modeling in mudrock reservoirs
- Fractures vs matrix: are both critical for hydrocarbon storage and flow?
- Resource assessments
- Case studies
- Analysis of abnormally pressured mudrock reservoirs
- Techniques for investigating reservoir quality of mudrock reservoirs

We are especially interested in recent multidisciplinary reservoir studies, new interpretations of outcrop to subsurface stratigraphy, new play concepts and prospects based on application of stratigraphy and petrophysics, and new insights into unconventional petroleum systems of Rocky Mountain basins. We welcome abstracts for the technical talks at the symposium with or without an associated core for the core workshop. Send your abstract in today and join us for **Unconventional Mudrocks, 2017! Deadline for abstract submission is June 1, 2017. Decisions will be returned by June 1.**

Speakers of accepted abstracts will be encouraged to submit a short (4-10 pages) technical paper by Aug. 1. We intend to publish separate booklets for the symposium and the workshop with abstracts and/or technical papers for participants.

For more information, or to submit an abstract, please contact: David Katz (david.katz@whiting.com) for the core workshop or Katerina Yared (katerina.yared@qepres.com) for the technical symposium.

Sponsorship opportunities exist.

Permian Basin level	\$2500
Western Gulf-Eagle Ford	\$1500
Williston Basin	\$1000
Powder River Basin	\$500
Greater Green River Basin	\$250

Potential sponsors should contact Barbara Kuzmic (bkuzmic@rmag.org) for more information.
